## Waxing

Prior to the treatment - the area to be waxed will be cleansed using a specially formulated pre-cleansing lotion. Then a high quality warm wax will then be applied to remove the unwanted hair. You should ensure that the hair to be waxed is a minimum of around 0.75cm - 1cm so that the wax will take to the hair effectively. This is normally around 2 weeks post-shaving growth for most ladies or 4-6 weeks post waxing.

Once the waxing has been completed, a soothing lotion or an Aloe Vera Gel is applied to nourish and calm the skin helping it to recover quickly from the waxing treatment.

### Benefits of waxing

- Will help keep skin looking naturally smooth
- Waxing lasts 4-6 weeks - compare that to shaving which can last just a day or two
- Hairs become sparse over time
- Hairs become finer and weaker
- Slows down hair growth

### Eyebrow Tidy

Gently cleanse the eye area. A warm wax is then applied, followed by the hair removal process. A calming Aloe Vera Gel is then applied to help soothe the skin.
